PHẠM THỊ THANH BÌNH (Editor in Chief). **Develop logistics during process of forming ASEAN economic**

community ASEAN. H.: Social Sciences Publishing House, 2009, 250 pg., Vb 48148.

Logistics is understood as network of mutual activities nationally and internationally in order to transfer and move economic resources places where they are gathered and exploited to places of manufacturing, consuming those kinds of goods or services. This network includes connectivities of transportation, multi-form telecommunication information (under different forms), intersection related to transferring, storing, kinds of payment transferring license, product packing and distribution.

The book analyse development reality of some logistics service mostly served in domestic trade and import and export within ASEAN, including the same growing situation of logistics; other services support for development of logistics such as transportation, telecommunication information technique, storehouse to preserve and store goods. Besides, authors also clarify subjective, objective reasons which push up the need to quickly integrate into ASEAN logistics system, route to develop logistics in ASEAN. Base on this, the authors brought out some recommendation to develop logistics in Vietnam in coming years.

TRUNG HẬU

Central committee for communication and education. **Vietnam's strategy for sea: from viewpoint to practice.** H.:

National Political Publishing House, 2010, 379 pg., Vb 48122.

21st century is “century of ocean”, sea exploitation is becoming important strategic issue of most nations in the world, including countries with or without sea, not only due to the exhaustion of natural resources on land but due to population explosion. Therefore, the promotion of scientific technology researching for sea is indispensable tendency of nations with sea to seek for and ensure demand of material, energy, food and existing space in coming years.

Vietnam is the same. We are on the West of South Chinese Sea – a large and important of the region and the world. In the ancient time, sea connected with all manufacture, living activities of Vietnamese. Enter 21st century, Vietnam directs toward the sea to strengthen potential of our nation.

HÒA AN

HOÀNG VĂN HOA (Editor in Chief). **Develop Vietnamese businessmen in period 2011-2020.** National Political Publishing House, 2010, 394 pg., Vb 48504.

In current context, demand to build up a businessmen keep pace with the task to develop socio-economy, speed up

industrialization, modernization, carry out the target to make Vietnam basically becomes an industrial country with modernization process by 2020, is urgent issue. During 20 years of renewal, Vietnamese Communist party and Vietnam State have brought out many policies to encourage development of businessmen, create favor conditions for them to do business authentically, contribute to Vietnam economic development. However, up to now, economic force of businessmen of Vietnam is weak and limited in number, scale competitiveness... which reduce activeness and capability of our international economic integration. The book is reference documents with practical values for researchers, policy makers and readers who pay attention to matter of businessmen, role and development of businessmen.

The book includes 3 chapter not only for theoretical issue but practice to develop businessmen force in modern market economy, experience in building up and developing businessmen in some countries and territory and also deeply expresses reality of businessmen development in Vietnam, elements which affect the formation, development, characteristics, contribution of businessmen for socio-economic development of Vietnam. From practical and theoretical analysis, the authors provide their viewpoints, solution to develop businessmen force for Vietnam in period 2011-2020.

KHÁNH HÀ

HOÀI PHÚC

NGUYỄN ĐỨC TĨNH. **State management of investing in developing vacational training in Vietnam.** People's knowledge Publishing House, 2010, 210 pg., Vb 48364.

Transferring to market economu, implementing industrialization, modernization and international integration, Vietnam economy has changed basically, productive forces develop, economic structure is

transferring strongly, together with the forming of industrial zones, producing zones, key economic zones, new technology, new business fields are diversified and plentiful. Actually, in recent years, Vietnam has paid more attention to vocational training in order to develop human resources, rate of trained labors increase, quality of vocational training also increase and change positively. However, quantity, quality of labor still dissatisfy requirement of human resources; imbalanced between university graduated staffs, technical workers, vocational trained labors. These limitation causes by many reasons, while the most important is because we has not effectively attract and use investment sources in developing vocational training, state managemeng on invest and develop vocational training ; although it is paid attention, it is not in conformity, it has not changed basically and suitably with the process of transferring from central, planed economy to market economy. The book is systematical study from theory to practice of the issue, then propose ideas of solution and theory to perfect the state mangement on investing and developing vocational training in Vietnam.

The book includes 3 chapters. Chapter I: Argumental foundation and practice of state mangement on invest and develop vocational training in market economy. Chapter II: Reality of state mangement on invest and develop vocational training in Vietnam. Chapter III: Direction and solution to perfect state mangement on invest and develop vocational training in Vietnam.
